Submission ID: 166014

Timestamp: 10/10/2026 10:01 PM UTC

Name: Edward Pena De Dios

Challenge ID: 59

Challenge Title: Configuration Management Gone Awry

This report has not been published by a curator. Experience Cyber cannot vouch for its accuracy.

## Scenario

An error in our managed service providers automated configuration management software has caused considerable damage to our network. Multiple systems and network pathways are now misconfigured and unable to be reconfigured with the automated tool. This downtime is costing the company considerably in online sales, in store sales, and employee productivity. We need you to manually reconfigure the affected systems and networking equipment to get us back online.

## Duration

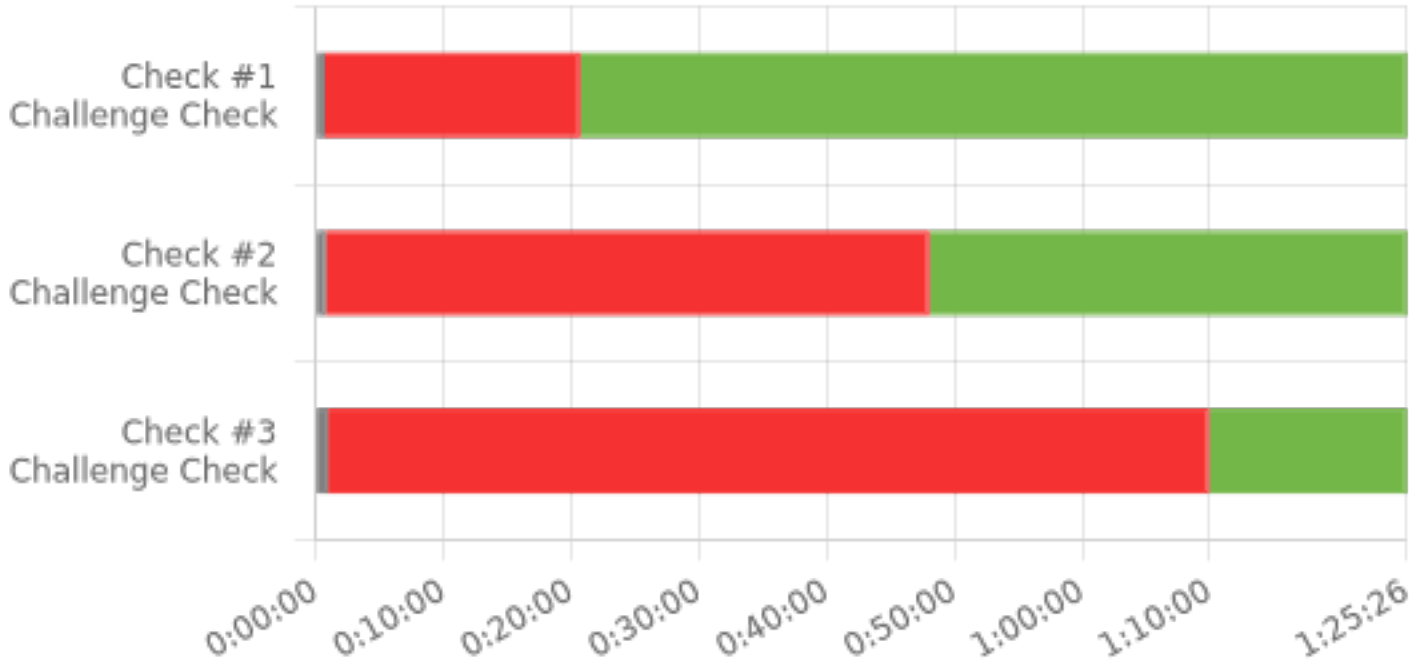

1:25

## Full Check Pass

Full: 4/4

## Final Check Details

- Check #1: Fileshare Connection Established
- Check #2: AD-Server Connection Established
- Check #3: Prod-Joomla Connection Established
- Check #4: Workstation Connection Established

## Element

Cybersecurity

## Work Role

Cyber Defense Analyst

## DCWF Tasks

• 1104: Examine network topologies to understand data flows through the network.

## Knowledge, Skills, and Abilities

• 22: Knowledge of computer networking concepts and protocols, and network security methodologies.

• 81A: Knowledge of network protocols such as TCP/IP, Dynamic Host Configuration, Domain Name System (DNS), and directory services.

• 90: Knowledge of operating systems.

• 92: Knowledge of how traffic flows across the network (e.g., Transmission Control Protocol [TCP] and Internet Protocol [IP], Open System Interconnection Model [OSI], Information Technology Infrastructure Library, current version [ITIL]).

• 342A: Knowledge of operating system command line/prompt.

• 1033: Knowledge of basic system administration, network, and operating system hardening techniques.

• 1158: Knowledge of cybersecurity principles.

• 1159: Knowledge of cyber threats and vulnerabilities.

• 3431: Knowledge of OSI model and underlying network protocols (e.g., TCP/IP).

## Centers of Academic Excellence Knowledge Units

• Basic Networking

• Cybersecurity Foundations

• Cybersecurity Principles

• IT Systems Components

• Operating Systems Administration

• Operating Systems Concepts
